

Amhil Expansion in Poland

August 1, 2006, Mississauga, Ontario, Canada

Amhil Enterprises, a member of the Wentworth Technologies Group of Companies, is pleased to announce the addition of its fourth thermoforming line in its Polish division, Amhil Europa.

The 4th fully in-line thermoforming production line will be installed in the Zarnowiec, Poland manufacturing plant over the upcoming months and should be operational by the end of September 2006.

"The Amhil Europa facility, located 30 km. from the container port of Gdynia, is a fast growing part of our plastics thermoforming network that services client needs worldwide." said Bruce McNichol, President and Chief Executive Officer of Amhil Enterprises. "Our low-cost Polish operation delivers what our customer wants: quick turnaround, highest quality and the overall best value to be found in Western Europe or North America. Poland delivers value, by continuously improving its lean manufacturing principles and focusing on the customer's specific needs."

Mr. McNichol sees a bright future for the Polish operation and promises more capital investment in the future.

About Amhil Enterprises

Amhil Enterprises is a member of the Wentworth Plastics Processing Group and is the largest independent manufacturer of thermoformed plastic lids for disposable cups in the world. Amhil has thermoforming facilities in Mississauga and in Burlington, Ontario, Canada as well as a thermoforming facility in Zarnowiec, Poland and an injection mould plastics processing facility in Bydgoszcz, Poland. In its Zarnowiec facility, Amhil also manufactures drinking straws for the European market.
